Subject Index of Volume 32

Adhesion strength
  Knoop hardness and, in Ti interlayer modified TiN coating on 1008 carbon steel, 352
Alloy(s)
  interface structure of Cu/oxide precipitates in internally oxidized Cu–Al, 207
  theoretical method for determining basic parameters for short-range order of amorphous ternary, using X-ray diffraction, 63
  time-resolved scattering study of early-stage decomposition and ordering processes in Al–12 at.% Li, 336
Aluminum
  Al/poly(3-octylthiophene)In-Sn oxide Schottky barrier electronic device; rectification property and its temperature dependence, 380
  electronic structure and mechanical behavior of transition-metal aluminides; first-principles total-energy investigation, 25
  fluorescence emission of Ce^{3+} ions in $YAlO_3$ crystals by influence of doping concentration and codoping with Nd^{3+} and Cr^{3+}, 342
  interface structure of Cu/oxide precipitates in internally oxidized Cu–Al alloy, 207
  lateral orientation relationship between $YBa_2Cu_3O_{7-z}$ thin films and MgO(100) and $LaAlO_3$(102) substrates, 295
  microstructural study of MgO-doped alumina-based ceramic, 169
  time-resolved scattering study of early-stage decomposition and ordering processes in Al–12 at.% Li alloy, 336

Band structure
  exact model calculations for, applied to superlattices, 263
Barium
  influence of magnetic fields on diamagnetism and microwave absorption of $Gd_{1+x}Ba_{2-x}Cu_3O_7$ compounds, 183
  lateral orientation relationship between $YBa_2Cu_3O_{7-z}$ thin films and MgO(100) and $LaAlO_3$(102) substrates, 295
  preparation of fine, hollow, spherical $BaFe_{12}O_{19}$ powders, 43

Cadmium
  fabrication and characterization of $Cd_{1-y}Zn_yS$ and CdS(In) thin films prepared by spray pyrolysis, 361
Calcium
  lightweight $(Ca_{1-x}, Mg_x)Zr_4(PO_4)_6$ ceramics, 161
Carbon
  statistical model for nitrogen solution in molten Fe containing another interstitial constituent (C or Si), 153
Carbon steel
  Knoop hardness and adhesion strength in Ti interlayer modified TiN coating on 1008, 352
Ceramic(s)
  lightweight $(Ca_{1-x}, Mg_x)Zr_4(PO_4)_6$, 161
  microstructural study of MgO-doped alumina-based, 169
Cerium
  fluorescence emission of Ce^{3+} ions in $YAlO_3$ crystals by influence of doping concentration and codoping with Nd^{3+} and Cr^{3+}, 342

Chemical vapor deposition
  photoluminescence study for thermal- and impurity-induced order-disorder transformations in $Ga_{0.5}In_{0.5}P$ epilayers grown by metalorganic chemical vapor deposition, 73
Chromium
  fluorescence emission of Ce^{3+} ions in $YAlO_3$ crystals by influence of doping concentration and codoping with Nd^{3+} and Cr^{3+}, 342
Cobalt
  crystallization of seeded amorphous $Co(Si_{1-x}Ge_x)_2$, 57
  epitaxial $CoSi_2$ and $NiSi_2$ thin films, 107
  reactions between Co and Ga arsenide in bulk and thin-film forms, 300
Copper
  influence of magnetic fields on diamagnetism and microwave absorption of $Gd_{1+x}Ba_{2-x}Cu_3O_7$ compounds, 183
  interface structure of Cu/oxide precipitates in internally oxidized Cu–Al alloy, 207
  lateral orientation relationship between $YBa_2Cu_3O_{7-z}$ thin films and MgO(100) and $LaAlO_3$(102) substrates, 295
  mixed mobile ion effect in Cu and Ag molybdate glasses, 240
  oxidation and reduction of Cu oxide thin films, 1
  phase equilibrium of (Ag_2S+S) and $(CuS+S)$ from e.m.f. measurements in solid-state galvanic cells, 235
  room temperature oxidation of Si induced by UV irradiation of Cu_3Si, 390
  thermal diffusion and ion mixing of Cu/PPQ system, 386
Creep
  grain boundary electromigration and, 49
Crystallization
  of seeded amorphous $Co(Si_{1-x}Ge_x)_2$, 57

Decomposition
  time-resolved scattering study of early-stage, and ordering processes in Al–12 at.% Li alloy, 336
Diamagnetism
  influence of magnetic fields on, and microwave absorption of $Gd_{1+x}Ba_{2+x}Cu_3O_7$ compounds, 183
Diamond film
  effect of Ne on CVD, from methane-hydrogen plasma discharge, 255
Doping
  fluorescence emission of Ce^{3+} ions in $YAlO_3$ crystals by influence of doping concentration and codoping with Nd^{3+} and Cr^{3+}, 342

Electrical conduction phenomena
  versus temperature in lateral polysilicon pn junction; analysis and modelling, 368
Electromigration
  grain boundary, and creep, 49
Electronic structure
  and mechanical behavior of transition-metal aluminides; first-principles total-energy investigation, 25
Electron microscopy
  high resolution transmission, study of interfaces, 77
  very thin TiO_2 films by high resolution transmission, 203

X-ray diffraction, IR spectrometry and high resolution, on ordered Zn-substituted maghemites, 37
EPES
contribution of, in study of materials, 197
Epitaxial realignment
structural characterization of, of polycrystalline Si films, 99
Erasable optical disks
materials for, 189
Etching mechanism
of (100) n-GaP and n-InP in HCl solutions, 374

Fabrication
and characterization of $Cd_{1-y}Zn_yS$ and CdS(In) thin films prepared by spray pyrolysis, 361
fcc crystal
nanocavity in, 87
Fluorescence emission
of Ce^{3+} ions in $YAlO_3$ crystals by influence of doping concentration and codoping with Nd^{3+} and Cr^{3+}, 342

Gadolinium
influence of magnetic fields on diamagnetism and microwave absorption of $Gd_{1+x}Ba_{2-x}Cu_3O_7$ compounds, 183
Gallium
etching mechanism of (100) n-GaP and n-InP in HCl solutions, 374
photoluminescence study for thermal- and impurity-induced order-disorder transformations in $Ga_{0.5}In_{0.5}P$ epilayers grown by metalorganic chemical vapor deposition, 73
reactions between Co and Ga arsenide in bulk and thin-film forms, 300
Germanium
crystallization of seeded amorphous $Co(Si_{1-x}Ge_x)_2$, 57
Glow discharge decomposition
microcrystalline Si deposited by, of heavily diluted silane, 273
Grain boundary
electromigration and creep, 49

HDDR
high-coercivity $Sm_2Fe_{17}N_x$ powders produced by, and nitriding processes, 280
High T_c superconductors
main properties and origins of new, 177
Hydrogen
effect of RF power on hydrogen content of sputtered amorphous Si, 349

Indium
Al/poly(3-octylthiophene)/In-Sn oxide Schottky barrier electronic device; rectification property and its temperature dependence, 380
etching mechanism of (100) n-GaP and n-InP in HCl solutions, 374
fabrication and characterization of $Cd_{1-y}Zn_yS$ and CdS(In) thin films prepared by spray pyrolysis, 361
photoluminescence study for thermal- and impurity-induced order-disorder transformations in $Ga_{0.5}In_{0.5}P$ epilayers grown by metalorganic chemical vapor deposition, 73
single wafer integrated processes by RT-LPMOCVD modules; application in manufacturing of InP-based laser devices, 315
Interfaces
high resolution transmission electron microscopy study of, 77
Interface structure
of Cu/oxide precipitates in internally oxidized Cu–Al alloy, 207
Ion effect
mixed mobile, in Cu and Ag molybdate glasses, 240
Ion mixing
thermal diffusion and, of Cu/PPQ system, 386
Iron
high-coercivity $Sm_2Fe_{17}N_x$ powders produced by HDDR and nitriding processes, 280
preparation of fine, hollow, spherical $BaFe_{12}O_{19}$ powders, 43
statistical model for nitrogen solution in molten Fe containing another interstitial constituent (C or Si), 153
IR spectrometry
X-ray diffraction, and high resolution electron microscopy on ordered Zn-substituted maghemites, 37

Jelly-roll process
for high temperature superconducting tapes and wires, 95

Knoop hardness
and adhesion strength in Ti interlayer modified TiN coating on 1008 carbon steel, 352

Lanthanum
lateral orientation relationship between $YBa_2Cu_3O_{7-x}$ thin films and MgO(100) and $LaAlO_3$(102) substrates, 295
Laser devices
single wafer integrated processes by RT-LPMOCVD modules; application in manufacturing of InP-based, 315
Lateral orientation
relationship between $YBa_2Cu_3O_{7-x}$ thin films and MgO(100) and $LaAlO_3$(102) substrates, 295
Light-induced current
observation of, from porous Si device, 310
Lithium
time-resolved scattering study of early-stage decomposition and ordering processes in Al–12 at.% Li alloy, 336

Maghemites
X-ray diffraction, IR spectrometry and high resolution electron microscopy on ordered Zn-substituted, 37
Magnesium
lateral orientation relationship between $YBa_2Cu_3O_{7-x}$ thin films and MgO(100) and $LaAlO_3$(102) substrates, 295
lightweight $(Ca_{1-x}, Mg_x)Zr_4(PO_4)_6$ ceramics, 161
microstructural study of MgO-doped alumina-based ceramic, 169
Magnetic fields
influence of, on diamagnetism and microwave absorption of $Gd_{1+x}Ba_{2-x}Cu_3O_7$ compounds, 183
Manganese
experimental and theoretical studies of tetraethoxysilane gelation doped with Mn(II), 286
Mechanical behavior
electronic structure and, of transition-metal aluminides; first-principles total-energy investigation, 25
Methane-hydrogen plasma discharge
effect of Ne on CVD diamond film from, 255
Microstructural study
of MgO-doped alumina-based ceramic, 169
Microwave absorption
influence of magnetic fields on diamagnetism and, of $Gd_{1+x}Ba_{2-x}Cu_3O_7$ compounds, 183

Model calculations
exact, for band structure applied to superlattices, 263
Molybdenum
mixed mobile ion effect in Cu and Ag molybdate glasses, 240

Nanocavity
in fcc crystal, 87
Neodymium
fluorescence emission of Ce^{3+} ions in $YAlO_3$ crystals by influence of doping concentration and codoping with Nd^{3+} and Cr^{3+}, 342
Neon
effect of Ne on CVD diamond film from methane-hydrogen plasma discharge, 255
Nickel
epitaxial $CoSi_2$ and $NiSi_2$ thin films, 107
Nitrogen
high-coercivity $Sm_2Fe_{17}N_x$ powders produced by HDDR and nitriding processes, 280
statistical model for nitrogen solution in molten Fe containing another interstitial constituent (C or Si), 153

Optical disks
materials for erasable, 189
Order-disorder transformations
photoluminescence study for thermal- and impurity-induced, in $Ga_{0.5}In_{0.5}P$ epilayers grown by metalorganic chemical vapor deposition, 73
Ordering
time-resolved study of early-stage decomposition and, processes in Al–12 at.% Li alloy, 336
Oxidation
and reduction of Cu oxide thin films, 1
room temperature, of Si induced by UV irradiation of Cu_3Si, 390

Phase equilibrium
of (Ag_2S+S) and $(CuS+S)$ from e.m.f. measurements in solid-state galvanic cells, 235
Phosphorus
photoluminescence study for thermal- and impurity-induced order-disorder transformations in $Ga_{0.5}In_{0.5}P$ epilayers grown by metalorganic chemical vapor deposition, 73
Photoluminescence study
for thermal- and impurity-induced order-disorder transformations in $Ga_{0.5}In_{0.5}P$ epilayers grown by metalorganic chemical vapor deposition, 73
Plasma etching
of III-V semiconductor thin films, 215
Poly(3-octylthiophene)
Al/poly(3-octylthiophene)/In-Sn oxide Schottky barrier electronic device; rectification property and its temperature dependence, 380
Polyphenylquinoxaline
thermal diffusion and ion mixing of Cu/PPQ system, 386
Porosity
of silica gel by thermal desorption of liquids, 244
Probe microscopies
local, as tool for local surface studies, 267

Rectification property
Al/poly(3-octylthiophene)/In-Sn oxide Schottky barrier electronic device; and its temperature dependence, 380
Reduction
oxidation and, of Cu oxide thin films, 1
RF power
effect of, on hydrogen content of sputtered amorphous Si, 349
RT-LPMOCVD
single wafer integrated processes by, modules; application in manufacturing of InP-based laser devices, 315

Samarium
high-coercivity $Sm_2Fe_{17}N_x$ powders produced by HDDR and nitriding processes, 280
Schottky barrier
Al/poly(3-octylthiophene)/In-Sn oxide, electronic device; rectification property and its temperature dependence, 380
Semiconductor thin films
plasma etching of III-V, 215
Silane
microcrystalline Si deposited by glow discharge decomposition of heavily diluted, 273
Silica gel
porosity of, by thermal desorption of liquids, 244
Silicon
crystallization of seeded amorphous $Co(Si_{1-x}Ge_x)_2$, 57
effect of RF power on hydrogen content of sputtered amorphous Si, 349
electrical conduction phenomena versus temperature in lateral polysilicon pn junction; analysis and modelling, 368
epitaxial $CoSi_2$ and $NiSi_2$ thin films, 107
microcrystaline Si deposited by glow discharge decomposition of heavily diluted silane, 273
observation of light-induced current from porous Si device, 310
room temperature oxidation of Si induced by UV irradiation of Cu_3Si, 390
statistical model for nitrogen solution in molten Fe containing another interstitial constituent (C or Si), 153
structural characterization of epitaxial realignment of polycrystalline Si films, 99
Silver
mixed mobile ion effect in Cu and Ag molybdate glasses, 240
phase equilibrium of (Ag_2S+S) and $(CuS+S)$ from e.m.f. measurements in solid-state galvanic cells, 235
Single wafer integrated processes
by RT-LPMOCVD modules; application in manufacturing of InP-based laser devices, 315
Spectroscopic characterization
FTIR and UV-Vis (diffuse reflectance), of TiO_2 sol-gel, 141
Spray pyrolysis
fabrication and characterization of $Cd_{1-x}Zn_xS$ and CdS(In) thin films prepared by, 361
Statistical model
for nitrogen solution in molten Fe containing another interstitial constituent (C or Si), 153
Structural changes
on deactivation of ZSM-5; study by X-ray powder diffraction, 135
Structural characterization
of epitaxial realignment of polycrystalline Si films, 99
Sulfur
phase equilibrium of (Ag_2S+S) and $(CuS+S)$ from e.m.f. measurements in solid-state galvanic cells, 235

Superconducting tapes and wires
jelly-roll process for high temperature, 95
Superconductors
main properties and origin of new high T_c, 177
Superlattices
exact model calculations for band structure applied to, 263
Surface studies
local probe microscopies as tool for local, 267
Syntheses
of submicron TiO_2 powders in vapor, liquid and supercritical phases; comparative study, 249

Tetraethoxysilane
experimental and theoretical studies of, gelation doped with Mn(II), 286
Theoretical method
for determining basic parameters for short-range order of amorphous ternary alloys, using X-ray diffraction, 63
Thermal desorption
porosity of silica gel by, of liquids, 244
Thermal diffusion
and ion mixing of Cu/PPQ system, 386
Time-resolved scattering study
of early-stage decomposition and ordering processes in Al–12 at.% Li alloy, 336
Tin
Al/poly(3-octylthiophene)/In-Sn oxide Schottky barrier electronic device; rectification property and its temperature dependence, 380
Titanium
FTIR and UV-Vis (diffuse reflectance) spectroscopic characterization of TiO_2 sol-gel, 141
Knoop hardness and adhesion strength in Ti interlayer modified TiN coating on 1008 carbon steel, 352
syntheses of submicron TiO_2 powders in vapor, liquid and supercritical phases; comparative study, 249
very thin TiO_2 films by high resolution transmission electron microscopy, 203
Transition metals
electronic structure and mechanical behaviour of transition-metal aluminides; first-principles total-energy investigation, 25

UV irradiation
room temperature oxidation of Si induced by, of Cu_3Si, 390

X-ray diffraction
IR spectrometry and high resolution electron microscopy on ordered Zn-substituted maghemites, 37
theoretical method for determining basic parameters for short-range order of amorphous ternary alloys, using, 63
X-ray powder diffraction
structural changes on deactivation of ZSM-5; study by, 135

Yttrium
fluorescence emission of Ce^{3+} ions in $YAlO_3$ crystals by influence of doping concentration and codoping with Nd^{3+} and Cr^{3+}, 342
lateral orientation relationship between $YBa_2Cu_3O_{7-x}$ thin films and MgO(100) and $LaAlO_3$(102) substrates, 295

Zinc
fabrication and characterization of $Cd_{1-y}Zn_yS$ and CdS(In) thin films prepared by spray pyrolysis, 361
X-ray diffraction, IR spectrometry and high resolution electron microscopy on ordered Zn-substituted maghemites, 37
Zirconium
lightweight $(Ca_{1-x}, Mg_x)Zr_4(PO_4)_6$ ceramics, 161
ZSM-5
structural changes on deactivation of; X-ray powder diffraction, 135

Forthcoming Meeting

Workshop

Materials Research Laboratory, University of Arizona, Tucson, AZ 85287 (USA)
March 8th–10th, 1993
The subject of the course is *Microtomy for Materials Science Applications*.

For further information please contact Dr. Bob. Chiovetti at the above address or telephone **(+1) (602) 889 7900**
